

## DRAINAGE

Do you have pools of standing water after a rain storm? Let Haynes Sprinkler Service check it out after the storm. We'll assess the area and make our recommendations as a friend. Area drains, French drains, or rain gutter drains may be exactly the solution to your water collection.

## LANDSCAPE RENOVATION

Are you adding, rearranging or making changes to your landscape this year? Anytime a landscape is changed, the irrigation will need to be changed to some degree. Invite Haynes Sprinkler Service to be part of your landscape planning. Upfront, we can help with adding, moving or refocusing your sprinkler heads to efficiently cover the new landscape design.

## ARE YOU ADDING A NEW POOL TO THE BACK YARD?

Haynes Sprinkler Service will work with your pool company to eliminate issues. We'll cap off the system and maintain your existing watering plan during the build, as well as redesign, adjust or install for the final landscape plan.

## OTHER AREAS OF SERVICE

Like with all areas of the home, maintenance is key to keeping repairs at a minimum and the value of your investment high. Talk to us about regular inspections, seasonal programming changes or adjustments for proper working order. Or how about WIFI programming capabilities while away from your property? Ask us!

Better yet, Haynes Sprinkler Service has a VIP PLAN just for you and your irrigation system management. For one low monthly fee, Haynes Sprinkler Service will:

- Provide annual or seasonal monitoring of your controller
- Assist with a WIFI controller for off-site programming and management
- Regular inspection of your irrigation system
- Do custom programming to fit the needs of the landscape
- Offer water management and conservation tips
- Plan a water budget
- Keep you updated on city regulations and laws
- Extend discounts for emergency repair services
- And discounts for regular repair costs

## WHO WE ARE

After 26 years as a McKinney based landscape design & management company Haynes has added a new specialty division, Haynes Sprinkler Service. We want to continue to help our friends through cost effective pricing, quick response times and great friendly service, while extending our expertise in the area of sprinkler services.

With current water shortages and city restrictions we can help convert your current system into a low volume, efficient irrigation process. We'll help you save water and save money as we keep your home lush and beautiful all summer long.

Building friendships is why Haynes is in business! We delight in our long term client relationships and are excited to add new homeowners to the Haynes family of customers. Our passion is supporting worldwide missions, and if it weren't for a long line of happy, satisfied customers, we wouldn't be able to travel and serve around the globe.

## TESTIMONIALS

*"I would highly recommend Haynes Irrigation. They are a company that really cares about their customers. I have had them out to my house numerous times over the years and they have always been thorough and spent the time needed to get the job done right!" Using them gives me a peace of mind about my irrigation needs"*

*"Haynes Landscape Irrigation VIP program is a time and money saver, not to mention peace of mind knowing my irrigation system is inspected by experts and not me!"*

## REPAIR

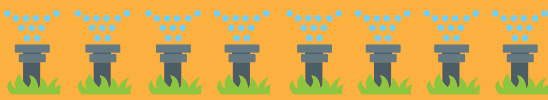

From replacing damaged sprinkler heads to pipe leaks, Haynes Sprinkler Service will keep your system operating efficiently. Do you need your controller box replaced? Our expert technicians will have your system working again in no time. Are valves sticking and not operating as they should? From top to bottom, Haynes Sprinkler Service cares about the maintenance and efficiency of your system.

## EMERGENCY RESPONSE

Haynes Sprinkler Service is "on" 24 / 7. Your emergency calls are responded to after hours, weekends and holidays. We want to get to your emergency as quickly as possible and fix the problem before it becomes out of control.

## DO YOU KNOW HOW MUCH WATER YOU ARE USING ON YOUR LANDSCAPE?

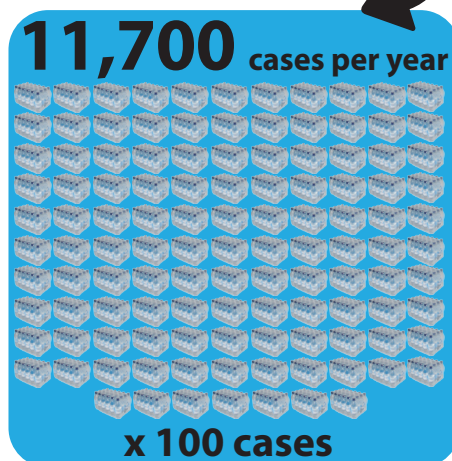

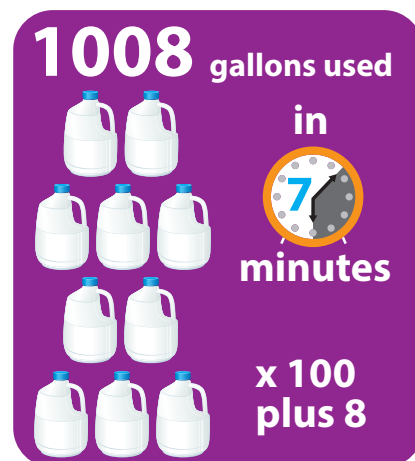

### The Average Yard

Has Eight Stations

**282,479**  
20oz. bottles  
in 12 months

Based on 8 zones. 7 minute run cycles. 8 gallons per minute through each valve. Estimated average and not any one system will be the same.
